## **LEADERS IN DEMOLITION AND WASTE MANAGEMENT**

✓ Demolition & Enabling Works

✓ Waste Management

✓ Aggregates & Concrete

Established 1994

# A business built on firm principles

Setting the bar high for sustainability

Since 1994, we've grown and adapted to become the enabling partner for construction projects, and leaders in recycling and waste management. Driven by a zero-waste commitment, we take waste from site and process it to make it useful again in our premium recycled aggregates and award-winning ready-mix concrete. We call this 'recycling the past for the future'.

- Robert Collard, founder and managing director

Exceeding expectations

# WELCOME TO COLLARD GROUP

We are proud to be the enabling partner for construction projects nationwide. As a leader in recycling and waste management we are driven by a zero waste to landfill commitment.

“This is a business with a clear plan that has shown strong growth, been dynamic, adventurous, invested in R&D, and is making a difference in the industry.”

- Judge's comments, MRW National Recycling Awards 2020:

our fleet and plant

About us

# Collard in numbers

---

We have grown from a sole-trader business started in 1994 to one of the largest and most influential privately owned demolition contractors in the UK and waste management businesses in the south of England.

Every year, we re-invest substantially in our infrastructure, plant, training and equipment to ensure we keep growing and innovating.

## WHAT WE DO

- ✓ **Demolish buildings** and **remediate sites** for redevelopment
- ✓ **Collect waste** from construction and demolition sites, commercial clients and domestic customers
- ✓ **Recycle waste** and make it useful again
- ✓ **Create** and deliver **recycled aggregates** and **ready mix concrete**

The Collard Group

# An end-to-end solution

**Over the last 30 years we've expanded our operations to become an end-to-end enabling partner for construction projects and a one-stop-shop for our clients.**

We work with clients from site survey to soft strip and asbestos removal before full structural demolition, remediation and earthworks. We haul waste from site and recycle it into products re-used by the construction industry.

With the capacity to process over a million tonnes of waste a year at our nine waste transfer stations and urban quarries, we separate, process and recycle materials using state of the art equipment and processes, diverting almost all waste from landfill.

**DEMOLISH**

**DISPOSE**

**RECYCLE**

## Our mission

# What you can expect from us

We deliver expert solutions for complex demolition and waste management projects nationwide. Our approach helps our public sector, local authority, commercial and residential clients achieve zero-to-landfill targets and sustainability goals.

## Scale and breadth

We're small enough to move at pace and deliver a personal touch. But big enough to handle complex, multifaceted, nationwide projects.

## Extensive experience

We've been growing, adapting and shaping the industry for four generations. That's decades of knowledge to tap into that we bring as solutions to our clients' challenges.

## Future-orientated

Always evolving, our industry never stands still. And neither do we. We exploit the latest technology and skills to keep growing and innovating.

## Environmental integrity

We take domestic, construction and demolition waste, process it and make it useful again. We proudly divert almost all of it from landfill.

## Family values

We're an established, family-run business. Personally invested in what we do, we care deeply for our clients, our people, and the planet.

Recycling the past  
for the future

We process C&D waste to make it useful again. Our premium grade recycled aggregates are used for future construction projects along with our award-winning ready mix concrete that's made using recycled aggregates.

Keeping projects moving

# Fleet, plant and equipment

**Our extensive portfolio of the latest equipment means we can tackle any project safely and efficiently.**

Our highly skilled drivers operate excavators from 1.5 to 100 tonnes, and demolition plant capable of reaching heights of 40m. They transport demolition plant, haul C&D waste, undertake our commercial waste management operations and deliver and collect domestic skips.

And our fleet replacement policy ensures we're running the latest vehicles with industry-leading safety standards and low emissions credentials, helping to reduce our carbon footprint.

**Reliability**

**Sustainability**

**Safety**

**We're proud of our high standards so we maintain our fleet and plant in-house, working 24/7 on servicing and repairs.**

Our MOT pass rate is well above the national average and our Operators Compliance Risk Score is 100% green. By achieving FORS Gold year-on-year we continue to demonstrate that we're not just meeting minimum industry standards but always striving to set the bar.

Responsible business

**We work with integrity,  
respecting people and  
the planet**

**Investing in skills and development**

## PEOPLE Looking after our people

**Our people are at the heart of our business, and our success.**

We have a strong philosophy of promoting from within, investing in training and apprenticeships to give people opportunities and confidence in a long career with us.

**Supporting groups and projects**

## COMMUNITY Looking after communities

**We're a proud supporter of a wide range of community groups and projects every year.**

Our flexible approach means we find many different ways to help; from investing time and money to providing plant and materials.

## Partnering with suppliers

We value our working relationships with all of our suppliers and their staff; it's part of our continued success.

# PLANET

## Looking after the planet

---

**We're reducing our own environmental impact and helping our clients to do the same.**

Having championed our 'recycling the past for the future' ethos for over two decades, sustainability has always been at the heart of our business. Our ability to collect, transport, segregate, process and recycle waste, coupled with our low emissions fleet and state of the art plant underpin our net zero objectives and ambition to become carbon neutral.

### Targeting carbon zero

Recycling the past for the future

**Diverting 1m tonnes  
of waste material from  
landfill every year**

Paving the way

# ENABLING CONSTRUCTION WORKS, NATIONWIDE

We offer a one-stop-shop for developers. Our expertise spans initial consultancy and site investigation through to asbestos removal and soft strip before full structural demolition, earthworks and land remediation, handing sites back ready for redevelopment.

“We’ve been operating in demolition and enabling works for over 25 years, providing expert solutions for complex projects, nationwide. Our experienced management team and highly trained and skilled operational workforce ensure projects are delivered on-time, to specification and budget.

- Robert Collard, founder and managing director

Enabling works

# Setting up your site for success

## Demolition

We operate across Britain, delivering a complete range of demolition services to main contractors, property developers, and domestic customers.

## Remediation

We make sure brownfield sites are safely cleared, removing contaminated waste and hazardous materials, ready for redevelopment.

## Earthworks

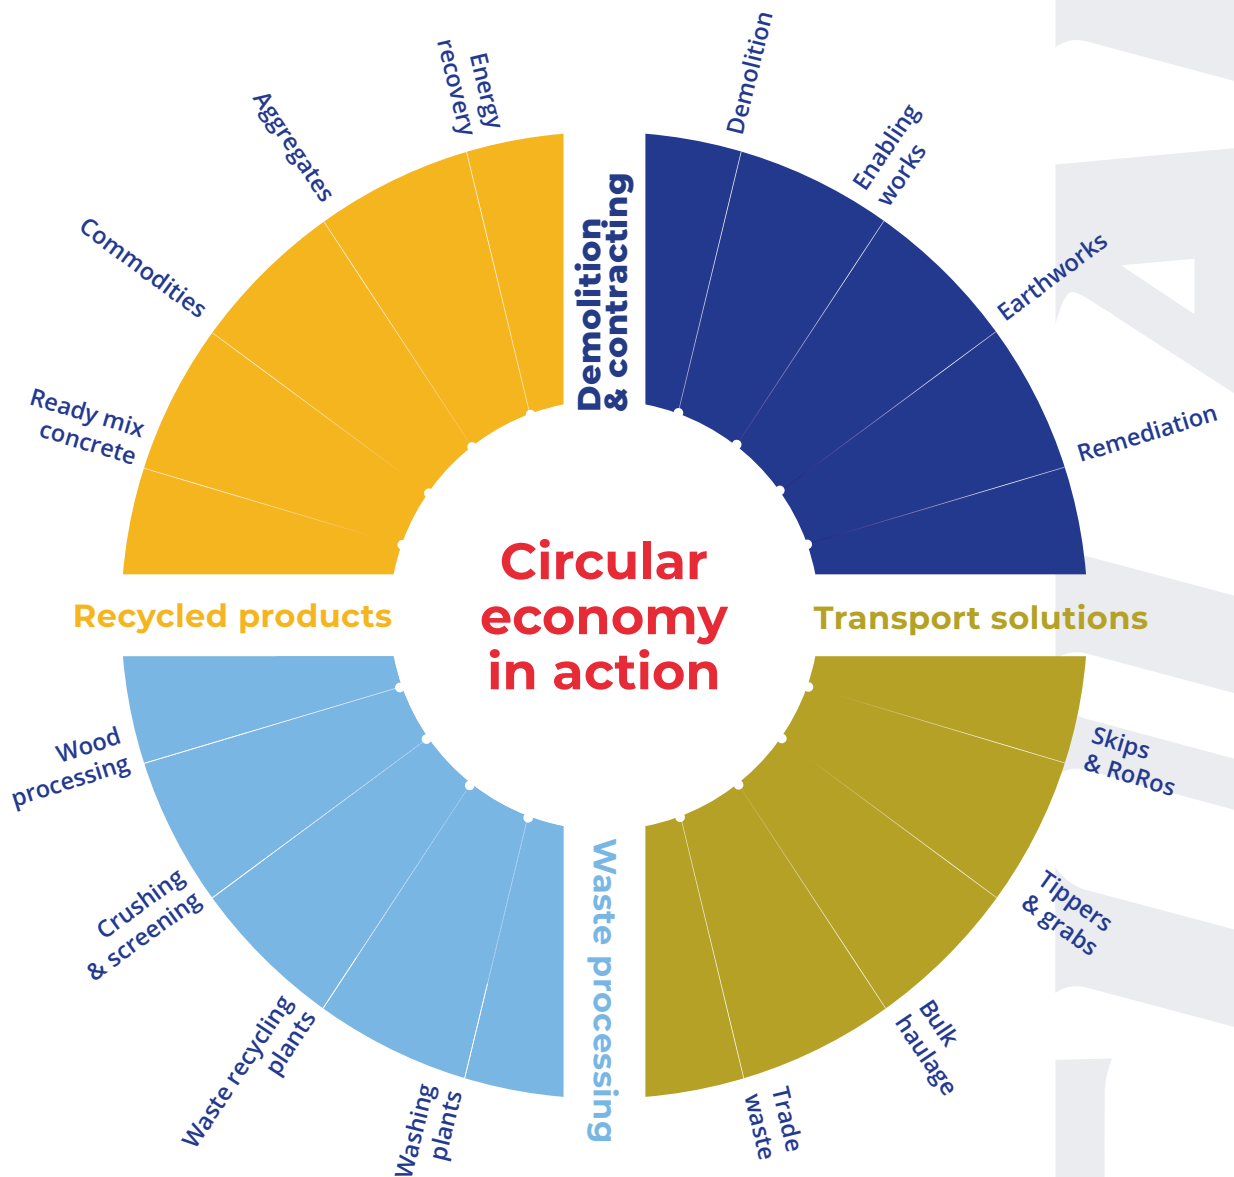

We provide a complete bulk earthworks service from design to engineering, excavation, re-deposit, re-grading, levelling, and disposal of large volumes of material.

We take a consultative approach to demolition, enabling works, and waste management, providing bespoke solutions for our clients.

- Innovation in data and reporting
- Continued investment in people and technology
- Energy consumption and CO<sub>2</sub> emissions minimised
- Zero waste to landfill commitment

0% waste, 100% commitment

# ACHIEVING NET ZERO

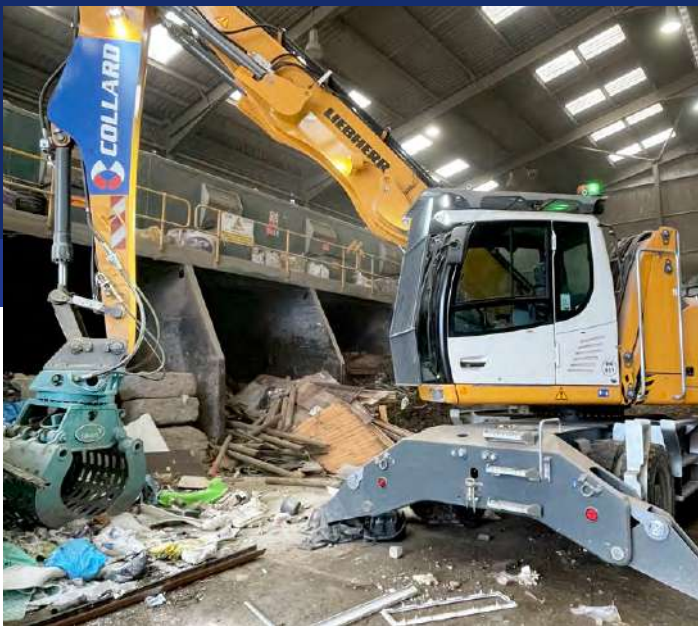

Our comprehensive ability to collect, transport, and segregate waste is underpinned by real-time tracking and detailed data analysis. We use innovative processes and state of the art recycling plant at our nine licenced waste transfer stations to divert over 1m tonnes of waste from landfill every year.

Waste management

# Taking our responsibilities seriously

Driven by a zero waste to landfill commitment, we collect, transport, segregate, process, and recycle waste materials to make them useful again.

We harness the latest technology to weigh, track and schedule waste collections, on or off site and provide our clients with the necessary reporting required for legal compliance.

## WASTE TYPES WE HANDLE

- ✓ Construction and demolition waste
- ✓ Domestic and commercial waste
- ✓ Hazardous and non-hazardous materials
- ✓ Ferrous and non-ferrous metals

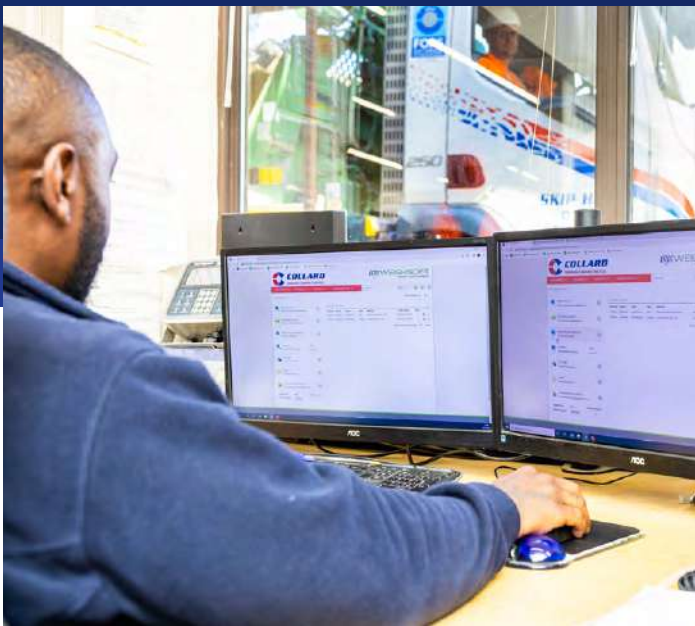

## COLLECTING & TRANSPORTING

- ✓ FORS Gold accredited sustainable transport fleet
- ✓ A range of **150 vehicles** to safely and effectively move waste around including skip lorries, RoRos, tippers, grab lorries and dust carts
- ✓ **Over 4,500 skips and containers** available for next day delivery

“Our waste management experts advise organisations on how to meet their regulatory obligations around sustainable waste management. We help them to bolster their environmental performance and achieve their carbon neutral targets.”

- Lee Phelan, managing director, Collard Environmental

## TECHNOLOGY & EXPERTISE

- ✓ Waste and container dispatching, tracking, weighing, reporting, and billing – **all done electronically** via Weighsoft
- ✓ **Expert environmental consultancy** available for construction and demolition projects

## PROCESSING WASTE

- ✓ **Nine licensed waste transfer stations**
- ✓ In-house fixed **crushing lines, wash plants, and materials recovery facilities**
- ✓ **Mobile recycling plant** for on site crushing, screening, and scrap metal processing

COLLARD  
READY MIX CONCRETE

Aggregates and concrete

# PREMIUM PRODUCTS THAT COME FULL CIRCLE

We take inert waste from construction and demolition sites and recycle it into premium aggregates for re-use in building development. We also use it in our award-winning ready mix concrete.

**Want to see sustainability in action? This is it.**

We demolish buildings, process the waste and return the same material back to site in a different format for an alternative use. It's this full-circle, sustainable operation that sets us apart from many of our competitors.

- James Chillery, managing director, Collard Aggregates

Quality assured

# Made by Collard

We provide a comprehensive range of high-grade recycled aggregates for use in construction and civil engineering projects. We're proud that the quality of our recycled aggregates is independently verified, and we can supply products to Series 600 Highways Specification standard, as well as to match our customers' bespoke requirements. All Collard manufactured ready mix concrete is quality-assured too, and complies with BSEN206 8500.

## RECYCLED AGGREGATES

- ✓ Recycled soft sand
- ✓ Recycled sharp sand
- ✓ Recycled ballast
- ✓ Recycled shingle
- ✓ Crushed concrete
- ✓ Crushed asphalt

## READY MIX CONCRETE

- ✓ We create a range of award-winning **BSEN206 8500 ready mix concrete** using construction and demolition waste
- ✓ We also offer **non-quality assured mixes**; an economical solution when strength guarantees are less of a priority

**Our sustainable approach** to recycling C&D waste saves our clients landfill and virgin material costs and **reduces the carbon footprint** of their operations.

## CASE STUDY

# Glaxo Smith Klein HQ Greenford

One of our biggest and most complicated demolition projects. Despite the complexities, this £5m project was delivered on time, on budget, and resulted in us winning 'Demolition Contract of the Year' at the British Demolition Awards.

This canalside location included a Grade II listed building, asbestos containing materials, operational businesses close by, and an unexploded Second World War bomb.

The project involved the demolition of several buildings on the headquarters site; the largest being four storeys above ground and a two-storey reinforced concrete basement, nine metres below ground.

Temporary works – in the form of steel sheet piling – were provided to support a 300mm diameter gas main that ran the full length of the building.

To help reduce the project's carbon footprint we used the nearby canal to transport over 1,000 tonnes of C&D waste by river barge which significantly reduced our vehicle movements.

### Key facts:

**61,000 square metres** demolished in total

**100,000 tonnes of material** processed through on site crushing plant and reused

Contract value **c. £5 million**

## CASE STUDY

# Farnborough International Airport

## Farnborough

**Our commercial and trade waste capabilities are in growing demand at major events because of our dynamic approach and sustainable solutions.**

That's why Farnborough International Limited appointed us to handle their day-to-day waste requirements as well as a very challenging schedule of events across the year.

These included prestigious and internationally recognised shows like Farnborough Airshow, Screwfix Live and the Homebuilding and Renovating show. In preparation for the Airshow we installed a purpose-built on site logistics hub to deliver an effective 24-hour waste management solution. With over 100,000 visitors and 150 exhibitors the volume and range of waste types was significant and had to be managed during a live event.

Our kit included electric rechargeable trolleys, on site compactors, refuse collection vehicles and road sweepers as well as over 500 bins of various sizes.

By segregating general waste, glass, food, cardboard and wood we were able to provide a major increase in recycling rates for the show.

### Key facts:

24-hour trade **waste collections** from over 150 exhibitors

**Advice and guidance** to help meet waste legislation

Contract value **c. £600,000** per annum

Four generations

# A century of success

Our business was founded in 1994 but our history in the waste sector stretches back generations. We're proud of our heritage and excited for our future; driven by a passion to continue to lead the way in demolition and waste.

**1994**

**Robert establishes R Collard Ltd, purchases his first lorry and digger and completes his first major demolition job for Bloor Homes**

**1930s**

Frederick Collard (Robert's grandfather) starts a food waste collection business in Eversley, Hampshire

**1992**

**Robert starts RJC Services: a sole trader providing mobile plant repairs**

**1970s**

Michael Collard (Robert's father) runs a landfill site at Eversley

Robert begins working for his father in the late 1970's

**1995**

**We buy our first brand new lorries: two eight-wheel tippers**

**1998**

**We sign a lease for a small corner of Eversley Haulage Park**

**1980s**

Michael starts a waste collection business: **M Collard Ltd**

2000

We win our **first £1m demolition project**: the Sunning Works at Watford

2017

Our **Metals Recycling Centre** in Wokingham **opens**

**Robert** becomes **Chairman of the NFDC** (London and Southern Counties)

Listed in The Sunday Times BDO **Profit Track 100**

Awarded **FORS Gold** accreditation

2005

Wokingham opens

2010

We become members of the **National Federation of Demolition Contractors**

2019

Our **ready mix concrete** gets the **BSI Kitemark**

We acquire Raymond Brown Waste Solutions with **three additional recycling facilities**

We hit **£50m turnover**

**£70m** turnover

2022

**Multi-million pound investment** in Reading, Southampton and Andover recycling facilities

We acquire **Amiante STR**, bolstering our asbestos capabilities

2021

We get a **double win** at the **National Recycling Awards**

**New recycling plants** acquired for Nursling, Chilton and Ewshot

2015

We **open** our **£2m aggregate wash plant**

We **win** the **Sustainable Construction & Demolition Project Award**

2016

Robert's father retires and we **purchase his business, M Collard Ltd**, and the Reading Recycling Facility

2018

We **win Demolition Contract of the Year** at the British Demolition Awards

New **£1m** state-of-the art **concrete plant** opened

2003

We **buy** our first waste plant and enter the skip hire market

**2023 and beyond**

The journey to **£100m**, zero waste to landfill and **net zero**

2020

We **launch** our **four new divisions** with a refreshed brand: contracting, environmental, aggregates, and ready mix concrete

Our **new fixed line crushing plant** is **operational** in Eversley
