

Enabling construction

# DEMOLITION

We operate nationwide delivering a complete range of demolition services to main contractors, property developers, and domestic customers.

## AT A GLANCE

A safe, skilled, and sustainable approach to demolition

- ✓ A one-stop-shop from consultancy to completion.
- ✓ All types of structures safely demolished.
- ✓ High reach and structural demolition expertise.
- ✓ Construction and demolition waste is processed for reuse.

## Enabling construction DEMOLITION

### Working together Your end-to-end enabling partner

- Structural demolition
- Soft strip
- Structural alterations
- Site clearance
- Earthworks & civils
- Service diversions
- Asbestos services
- Environmental services
- Remediation services

We help you improve the environmental performance of your projects to achieve your carbon neutral targets.

### What our customers say

The project involved the demolition of 70 maisonettes in a 1960s concrete structure, adjoining a lake and a temporary library...there have been some significant challenges along the way, which Collard has approached in a very positive manner.

Hugo Buchanan,  
Director of Infrastructure Delivery, Peabody

### Driven by zero-waste-to-landfill

We minimise the environmental impact of your demolition project by recycling construction and demolition waste, so it's made useful again in redevelopment.

We strive to reduce the wider impacts of our demolition work to limit emissions, noise, vibrations, traffic, and dust – while engaging positively with local communities and adding real social value.
