

30 years of experience

LAND REMEDIATION & EARTHWORKS

We've built an outstanding reputation for successfully repurposing difficult or contaminated brownfield sites, using innovative solutions.

AT A GLANCE

A comprehensive range of services to set your site up for success

- ✓ Brownfield sites are safely cleared and decontaminated, so they're ready for development.
- ✓ Chemical, biological, physical, and thermal options available for treating contaminated land.
- ✓ End-to-end bulk earthworks capabilities to support your project, including excavation, re-deposit, re-grading, levelling, and material disposal.
- ✓ Large volumes of waste can be collected, processed, and recycled at one of our nine licensed waste transfer stations.

30 years of experience

LAND REMEDIATION & EARTHWORKS

WHY COLLARD?

One-stop-shop: Our highly skilled multidisciplinary team can manage every aspect of your project from start to finish.

Extensive experience: We've been providing our clients with value-engineered solutions to difficult or contaminated brownfield sites for over 30 years.

De-risking projects: We apply a wide variety of ground solutions during demolition to ensure projects are shovel-ready far earlier.

Fleet, plant, and equipment: Every year, we invest around £8m in specialist vehicles, plant, and equipment to handle every type of construction activity.

A complete range of services

End-to-end award-winning services

Typical remediation services include:

- Site surveys
- Contaminated soil treatment
- Soil stabilisation
- Brownfield site regeneration
- Asbestos removal
- Hazardous and non-hazardous waste management

Typical earthworks services include:

- Site clearance and muck away
- Groundworks
- Excavation, re-deposit, re-grading, levelling
- Building of embankment and acoustic or landscape bunds
- Waste materials consultancy, handling, and recycling
- Enabling, service diversions, and Section 278 street works

Sustainable waste handling

In 2021, we received the Balfour Beatty Sustainability Award for the £4m earthworks project we delivered, paving the way for the Wokingham North West Distributor Road.

The award recognised our ability to recycle waste material from site and make it useful again in the form of top-grade recycled aggregates.

What our customers say

Collard was appointed as a key supply chain member to Cazoo's aggressive construction and facility upgrade programme. They demonstrated that they are experts in Groundworks, Civils and Earthworks related projects, successfully delivering a number of projects within programme & budget. The management of their works was very professional, including strong cost control & presenting Value Engineering opportunities to help the client achieve their objectives.
