Maximising your waste management practices

# TRADE WASTE

**We partner with you to transform your waste management practices in a way that's good for business and good for the environment.**

## AT A GLANCE

### The complete waste management solution from Collard

- ✓ Experts on hand to audit, advise, and manage all aspects of your waste to achieve your sustainability goals.
- ✓ Digital monitoring and reporting to track and inform your sustainability actions.
- ✓ State-of-the-art recycling facilities across nine licensed waste transfer stations.
- ✓ 24/7 mobile onsite waste solutions available to support temporary events or projects.

Maximising your waste management practices

## TRADE WASTE

### WHY COLLARD?

**Waste expertise:** Our knowledgeable team will help transform your waste management practices to help reduce your waste and your costs.

**A complete service:** We audit, advise, collect, track, transport, segregate, recycle, and sell recycled commodities.

**Technology:** We use the latest tools so you can view, control, and change your waste management processes to help you reach your sustainability goals.

**Capability:** With nine national recycling centres; over 5,500 skips, bags, and containers; 25,000 trade waste bins; and around 150 specialist vehicles to move your waste around – it makes sound business sense to partner with us.

Reducing our environmental impact and helping you to do the same

## We do so much more than collect your waste

### Minimise

- ↓ The volume of waste you create in the first place
- ↓ Your carbon footprint by reducing journey times and eliminating paper trails
- ↓ The amount of waste going to landfill
- ↓ The risk of pollution and environmental harm

### Maximise

- ↑ Landfill diversion
- ↑ Your bottom line
- ↑ Your environmental performance
- ↑ Your recycling rates
- ↑ Your sustainability goals

Diverting

**98% of waste from landfill**

We collect your waste, recycle your waste, and make your waste useful again. In adopting this circular economy approach, we ensure that almost all of it avoids ending up in a landfill site causing harm to the environment.

That helps both of us to run a more sustainable operation.

### What our customers say

We know that The Crown Estate is committed to making all projects as sustainable as possible and this project and the data you're providing regarding waste management is proving extremely helpful. Having a breakdown of the mixed waste and reliable information on where and how waste is processed is a vital part of the Development Sustainability Principles utilised by The Crown Estate.
